3.

Lines and Frames

Lines and frames are design tools used to separate sections of text, border pictures, and lead the reader's eye across pages.

QuarkXpress lets you create a variety of lines using tools in the **Tool** palette. You can style lines and frames using options in the **Style** and **Item** menus. You can even create custom line and frame patterns using the **Dashes & Stripes** dialog box (**Edit** menu).

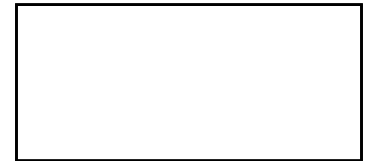

In this chapter you will design the concert ticket for one day's events at *The 2nd Annual Appolonian Music Festival*. You will learn how to create and format straight lines, merge several boxes into one shape, and add borders to boxes.

Defining Custom Colors as Spot Colors

An ulpute do eugait ullaor in velit dolore magnim irit ad endit iusci tionulputat, veliquatie feuisseolor ipit incidui ex eros nullaoreros at nis numsan ero odoluptat autetum venis augait verilla feupit, velis nim inissenim verostis aliquisi el ullum doloreet in utat at ilismolum dolorem am, qui tisi.
